## Message from Our Leaders

From His Desk :

“The essence of true education is not only to facilitate the students with tools to attain success in life but also to engrain values and skills in them.”

We, at Lloyd, work to incorporate the principles of modesty, compassion coupled with idea to effectuate innovation, growth and excellence. The curriculum of the program is industry oriented. Academic rigor is reflected in the course design and delivery of this program and I believe infusing technology into the management program will create futuristic jobs.

Various pedagogic tools help our students develop not only a holistic business perspective but an ability to seize opportunities in a competitive business environment. At the same time they remain committed towards the betterment of the society.

LBS is supported by state of the Art Infrastructure and coupled with industry oriented curriculum based on real life practical training. Academic rigor is reflected in the course design, delivery of academics and dedicated team of faculty members, equipped with right mix of industry-academic-research experience.

Members of faculty are involved in their pursuit of developing and disseminating knowledge through teaching, research and consulting. Lloyd Business School welcomes you to join us to realize your full potential under our able guidance.

*Manobar Thainani*  
President

As technology continues to advance at a frenetic pace and world becomes increasingly unpredictable, there is change everywhere.

And not just change mandated by the AI & IT but change that Mother nature keeps challenging us with - floods, draughts, tsunamis and the deadly pandemics like Covid 19. During the 2 years of standstill of Covid, the vacuum cleaner salesman had no sales. He could neither visit his prospects, nor give them a demo. He analyzed this & worked out a plan. He contacted his earlier buyers, interacted with them on FaceTime & based on trust relationship he had established with them, sought their experiences and with their permission, stand these FaceTime conversations with his prospects. He needed new skills: mobile skills, tact, networking & confidence.

Skills not taught in the post graduate management program. More & more employers are moving beyond degrees and job titles to focus more on the skills the changing business environment needs.

So perhaps this is the time to redress this short coming with a new look at one B-school environment and incorporate technology-based education.

Lloyd Business School is fully prepared for opportunities that the 4th Industrial Revolution is offering which emphasizes the interconnections of machines & systems to achieve optical performance & productivity gains, which is the aim of any business.

Industrial revolution 5.0 is said to take it a step further. By this, fine tuning is created b/w human & machines, a collaboration b/w automated technology's ultra-fast accuracy and human's intelligence & creativity.

PGDM-5.0 at Lloyd Business School focuses on use of modern cutting edge technologies like AI, IoT, Big Data, Cloud Computing, Block Chain, Digital twins along with training the management students with leveraging human creativity & intelligence.

Preparing you not only for today but ensuring a futuristic career for you as well. I extend a warm welcome to all management aspirants for admission 2023. May the best ones get selected at Lloyd!
